## ALUMNI CAREER SPOTLIGHT

### ASK THE ALUM

**Provide a brief job description. In your own words, what do you do on a daily basis?**

Business owners and/or investors need a team around them. This team consists of attorneys, accountants, financial advisors and real estate professionals, like me. I provide a variety of services including advising, brokering and consulting with them to help make the best strategic decisions involving their commercial real estate.

**What skills are most important for you to be successful in your position?**

A multitude of skills are important for me to use throughout the day, but a few that immediately come to mind are listening, time management, financial analysis and interpersonal skills.

**What do you like best about your job?**

Every day is a new challenge! I help positively impact communities and see the tangible results of helping small businesses. One of my favorite experiences is turning personal and family business dreams into a reality.

**What is the most challenging part of your job?**

The uncertainty of the microeconomy has a direct impact on my annual income, which provides a significant challenge for my Type A personality.

**What is one piece of advice you would offer alumni looking to enter your career or industry?**

Consider how various college courses (i.e. finance, marketing, economics, management, etc.) work together. I consistently use bits and pieces from each of these courses in my everyday work. The ability to merge knowledge from these various segments is integral!
